

SJEMR

This is a web based app platform which is mainly for hospitals, clinics who want to keep the records of patients information digitally and manage to quick access them any time to have better diagnosis and treatment which ensures appropriate care by reducing the data error and making life easier.

Our Core features

Let's have a glance of details of our core features and SJ EMR also has many more essential features, to explore them all please contact us and sign up for free trial!

Medicine Database

SJ EMR has its own medicine database that enables quick search of drugs and their details, making it extremely convenient.

ePrescription

It has an easy to use prescription module which is very user friendly for doctors. It is incorporated with our own drug database which allows doctors to quickly input medicines from an auto suggested dropdown list. Also can save custom prescription templates which increase doctors efficiency writing prescriptions within a very short time. It is Compatible with the Govt. Regulations.

Patient Demography

It's easier to find a patient's PHI; case study, appointment history, chief complaints, prescription history and documents (i.e: x-ray images, Full face photographic images and any comparable images).

Scheduling appointments

It's easier for the backend admins or other approved users to schedule an appointment with doctors more conveniently as per doctor's availability.

ZOOM integrated video calling feature

Once an appointment is scheduled for video consultancy it automatically sends the zoom meeting ID and password to a patient to have smoother video call experience with the doctor via Zoom.

Patient portal App

SJ EMR has its own web based patient portal and also an android app. By using that, a patient can easily schedule an appointment with a clinic and different specialty doctors. Accessing a patient's ePrescription, appointment status and history is now easier. It's ok to forget to bring the old prescription to the doctor visit.

Why should you trust us?

It's a serious concern for doctors and other clinicians to visualize and get patients all the information e.g: lab test report, x-ray images, previous medicine history, test cases in the same place and end up with lots of manual paper work and person to person workflow consumes lots of time. But this unavoidable problem can be solved easily by using SJ EMR.

We are an International company and member of Basis (Bangladesh association of software and information services), members of The sylhet chambers of commerce. Partner with Health support sylhet, the optimists and BD physicians.

Benefits of using SJ EMR

- Easy to use web-based software and user friendly UI
